

# FAUNA RESEARCH, INC TAMER™ ELEPHANT MANAGEMENT EQUIPMENT & FACILITIES

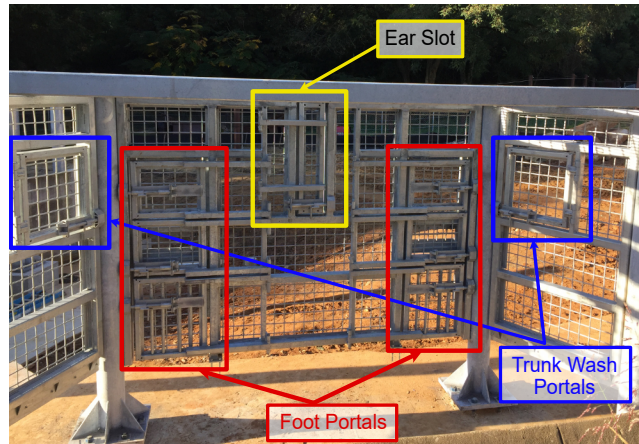

Multiple Access Doors for Flexibility in Training

### Hydraulic Roller Gates

Specially designed hydraulic roller gates feature overhead tube tracks built in framing which protect cylinders. The only gates in the industry that eliminate floor tracks!

Fauna Research has worked with elephant specialists for over 30 years in an effort to design and build equipment and facilities for safe and efficient management of elephants in both zoological and preserve settings.

### Elephant Training Wall

#### Features & Highlights:

*Self-locking, elephant-safe latches that are not vulnerable to curious trunks*

*Perfect for off-exhibit or public-facing training demonstrations*

**Ear Slot:** Strategically located for easy access for blood sampling

**Trunk Wash Portals:** Suitable for husbandry and medical care of trunks and tusks

**Foot Portals:** Several access points with movable rods to provide adjustable space for full spectrum foot care

Numerous Access Points for Foot Care
